Larry Thomas (812-569-2000) bought this bull in 2019. He's had over 20 calves out of heifers and all have been unassisted. Very moderate-framed bull that will make easy-keeping cows. He can be used on heifers for his extreme calving ease or cows to make replacement females. Keep back all of his heifers if you want 1200-1300# cows that won't eat you out of house and home.

Adam Carr (502-298-9074) bought this bull at the 2018 sale and he has kept back some daughters and is willing to sell the bull. This bull is a power bull on growth. His dam went to market at 16 years of age and produced many great bulls for us. His sire is "Butkus" an Angus bull we've used for years. He is calving ease enough to use on heifers. His daughters should be amazing.

Call Mark at 765-714-1092 or the herd bull owner for details on these bulls. In each case these owners are willing to sell these bulls and if they do not sell them, they will continue to use them. These are excellent bulls that will make a positive impact on their new herd.
